

CAWEB-506-1503 | Introduction to Web Development

Task 1

Lecturer: Matthew Abraham Cumbo

Matthew Grima 5.1A

Web Accessibility

This is when you make a website suitable for anyone including people of any age and those who have a disability.

Your website needs to be aesthetically pleasing in order to have users visit your website.

Also, the functionality of the website needs to be simple and straight forward.

Here I will be talking about how a website should be and shouldn't be. I will also talk about how I will implement the website I'm about to make.

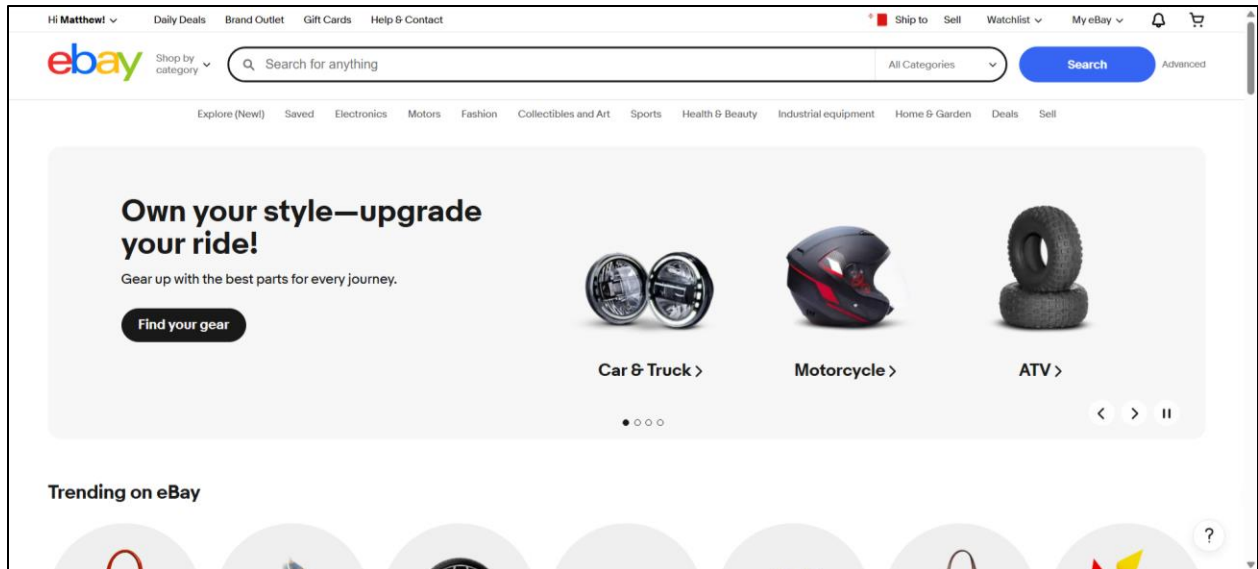

Ebay

Ebay is a great example of a good website. Ebay is a website that the main purpose is for people to buy and sell their own belongings to other people.

The website is simplistic yet very pleasing with the use of colours and organization of content. Every item that is being sold is being put nicely together like a grid.

These kinds of visuals are perfect for the website since I am making a website where you buy and sell, and I like websites that look simplistic but still are informative.

The functionality is very simple since everything is very straight forward. The frontpage is very inviting and allows users to choose whatever they want.

Pacific Northwest X-Ray Inc.

This website was created in 1997 for the sole purpose of selling equipment related to x-rays.

The website's design seems to still be stuck in the exact year it was created. Despite still being in use, it hasn't even changed a single bit.

The imagery shown is crusty and none of them blends with the background.

The background looks like an absolute eyesore since it looks strange and doesn't reflect the website's theme.

The website looks confusing and its quite difficult to find certain items.

These kinds of problems are the kind of problems I am trying to avoid in my upcoming project. As I said before, I wanted to make a website that is very straight forward and pleasing to the viewer's eyes. I will at least use two different but familiar colours so that the site wouldn't look painful to look at. I will also make navigation simplistic with a navigation bar.

Pacific Northwest X-Ray Inc.

Simply the best!

Search for X-Ray Products. 

...Or select from some of our most popular....
